

Sadha Shivam Pendem

Senior Frontend Engineer • React.js • TypeScript • Next.js

Hyderabad, India | sadha.info.8328@gmail.com | +91 8328285571 | [linkedin](#) | [github](#)

PROFESSIONAL SUMMARY

Results-driven Senior Frontend Engineer with 4+ years of experience architecting high-performance, scalable web applications using React.js, Next.js, and TypeScript. Proven track record of delivering pixel-perfect, responsive UIs for enterprise and product-led companies across healthcare, media, and SaaS domains. Adept at translating complex requirements into reusable component libraries, optimizing Core Web Vitals, and driving cross-functional collaboration in Agile environments. Recognized with a Best Performer Award for consistently exceeding delivery benchmarks.

SKILLS

React.js | Next.js | Redux | Redux Toolkit | Context API | Material-UI | Tailwind CSS | Bootstrap | JavaScript | TypeScript | HTML5 | CSS3 | Python | NumPy | Pandas | Machine Learning Fundamentals | REST APIs | Responsive Design | Git | GitHub | GitLab | Bitbucket | VS Code | Postman | Figma | JIRA | Confluence | Jest | React Testing Library | Agile/Scrum | Problem Solving | Team Collaboration

WORK EXPERIENCE

Senior Associate Consultant – Frontend Engineer

July 2024 – Present

Infosys | Hyderabad, India

- Engineered and shipped production-ready features across multiple enterprise React.js / Next.js applications, reducing average page load time by ~30% through code splitting, lazy loading, and memoization.
- Built a library of 40+ reusable, TypeScript-typed React components, cutting feature development time by 25% and eliminating UI inconsistencies across product lines.
- Integrated 15+ REST APIs using Axios with centralized error handling and request-retry logic, improving data reliability and user-facing error rates by 40%.
- Implemented Redux Toolkit slices for complex global state, reducing prop-drilling across 5+ nested component trees and improving developer experience.
- Drove responsive, cross-browser UI delivery using Material-UI and Bootstrap, achieving 100% design fidelity across mobile, tablet, and desktop breakpoints.
- Diagnosed and resolved 60+ QA-reported frontend defects within SLA, maintaining <2% regression rate across two major quarterly releases.
- ✓ Awarded Best Performer Insta Award for exceptional delivery quality and commendable manager feedback within the first year.

Software Engineer – Frontend Engineer

March 2022 – Feb 2024

Extended Web AppTech llp | Hyderabad, India

- Developed and deployed 3 full-scale React.js + TypeScript SPAs for international clients, from design handoff to production release.

- Built a centralized component library using Material-UI following Atomic Design principles, accelerating UI delivery by 35% across 4 concurrent projects.
- Implemented Redux Toolkit for state management in data-heavy dashboards, reducing unnecessary re-renders by ~45% via selector memoization (reselect).
- Achieved 90%+ unit-test coverage on core UI components using Jest and Enzyme, catching 20+ critical bugs before QA handoff.
- Collaborated with backend engineers to define RESTful API contracts (Postman), cutting API integration delays by 50%.
- Optimised scroll-heavy views with React.memo, useMemo, and virtualisation techniques, boosting Lighthouse Performance scores from 62 → 88.

PROJECTS

Developer Portal for API Gateway – McKesson

- Designed and delivered a centralised developer portal enabling secure, self-service discovery and management of 100+ enterprise APIs across business units.
- Integrated Redocly to power interactive, versioned API documentation with endpoint-level details and try-it-out sandbox, reducing developer onboarding time by 60%.
- Built advanced analytics dashboards with filterable request logs, usage trend charts, and quota visualisations, enabling product teams to make data-driven API lifecycle decisions.
- Delivered reusable component architecture and performance-first UI design patterns, achieving a Lighthouse Performance score of 92 on initial load.

Local Video on Demand (VOD) Platform – Saudi Arabia

- Engineered performant, scroll-optimised UI components for video listing, content discovery, and playback screens serving a regional streaming audience.
- Implemented search, category filtering, and multi-faceted sorting using Redux Toolkit, reducing client-side data processing time by 50%.
- Applied React.memo, useMemo, and useCallback across scroll-heavy content grids, eliminating unnecessary re-renders and improving FPS from ~35 to ~58 on mid-range devices.
- Ensured cross-browser and cross-device compatibility on Smart TVs, mobile, and desktop using adaptive layout strategies and CSS media queries.

EDUCATION

Bachelor of Technology (B. Tech.) - Mechanical Engineering
JNTU (HYDERABAD)

Aug 2011 - May 2015

AWARDS & RECOGNITION

 **Best Performer Insta Award — Infosys, 2024–25** | Recognised for outstanding delivery quality and exemplary cross-team collaboration.
